DETAILED ACTION

Answer to Argument

Applicant's arguments accompanying their election without traverse of claims 1-78 on 11/13/2004 are not found persuasive because (claims 1-12 are different from claims 13-23), the independent claim 1 recited to a capacitor structure being made without a rough silicon layer, and a nitride layer under the rough silicon layer compared to the independent claim 13, claims 24-33 are different from claims 34-51, the independent claims 24 recited to a conductive rough silicon layer over a support surface, while the independent claims 34 recited to a storage node in a substrate. Further, the details of method independent claims 52, 59 and 64 are different, the claim 52, recited to a forming a nitride layer over a surface supporting the capacitor construction, the claims 59 recited to forming a storage node in a substrate, claim 64 recited to a forming a barrier layer at least over a storage node. Moreover, the details of the independent claims 71, 73, 75 and 77 are different.

Election/Restriction

This application contains claims directed to the following patentably distinct species of the claimed invention:

Embodiment I	Claims 1-12
Embodiment II	Claims 13-23
Embodiment III	Claims 24-33
Embodiment IV	Claims 34-41

Embodiment V	Claims 42-51
Embodiment VI	Claims 52-58
Embodiment VII	Claims 59-63
Embodiment VIII	Claims 64-70
Embodiment IX	Claims 71-72
Embodiment X	Claims 73-74
Embodiment XI	Claims 75-76
Embodiment XII	Claims 77-78

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no claims appear to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Jame E Lake on 9/30/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
